

EXPLORERS 2 – SHOWCASE INTRO

Brendan McCann

Lalith Varanasi

Victoria Opoku

WHAT DID WE LEARN THIS YEAR?

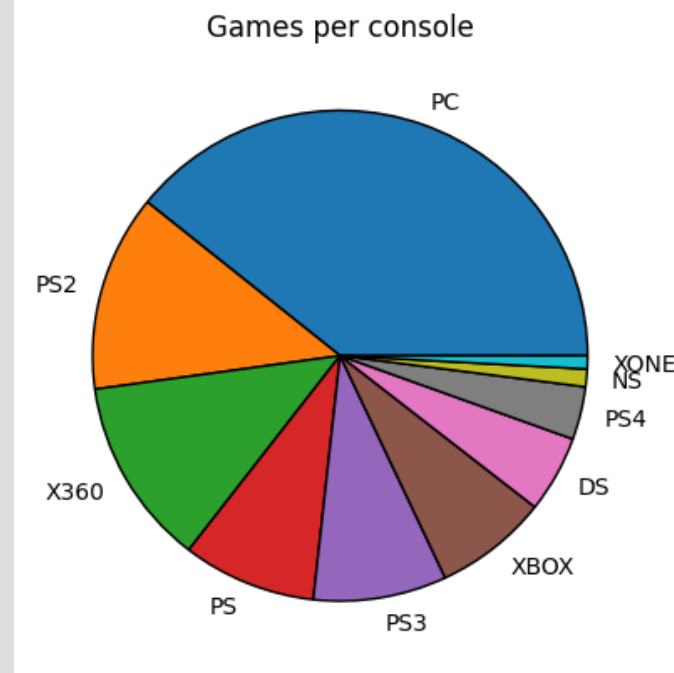

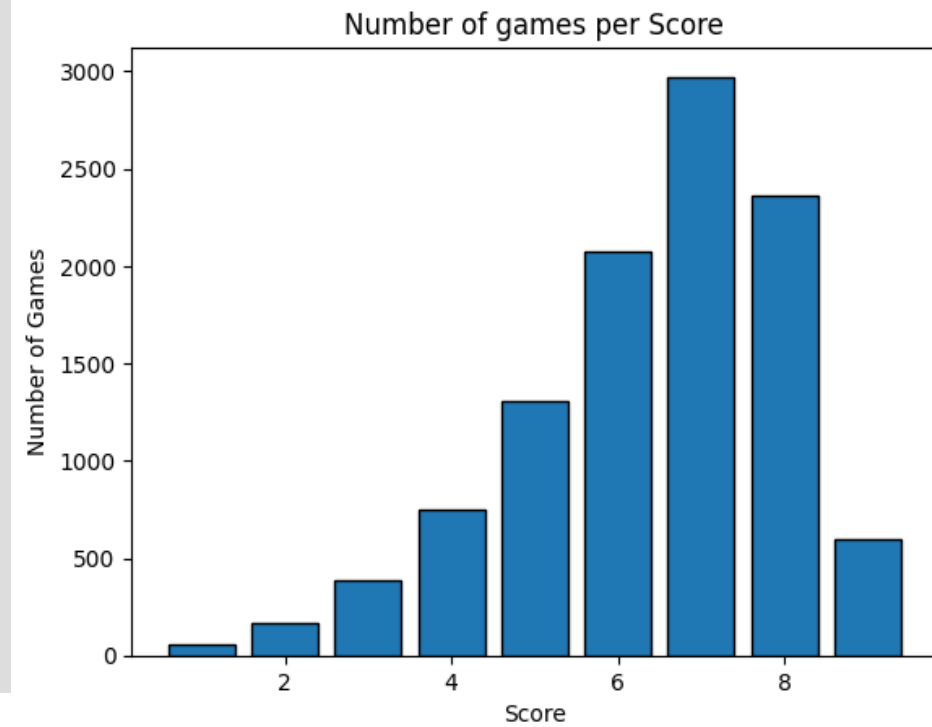

TERM I

- Python fundamentals
- Teaching skills as opposed to being project-focused
- Mini-games: Random number guessing games

```
Random Number Guessing Game!  
Guess a number between 1 and 10: 1  
Incorrect! 4 turns remaining  
Guess a number between 1 and 10: 5  
Incorrect! 3 turns remaining  
Guess a number between 1 and 10: 3  
Incorrect! 2 turns remaining  
Guess a number between 1 and 10: 2  
Incorrect! 1 turns remaining  
Guess a number between 1 and 10: 9  
Incorrect! 0 turns remaining  
You lose!
```

TERM 2

- Data Science!
- Handling and visualising data

TERM 3 – PROJECTS!

- Students could do their poster on (almost) any topic they were **passionate** about!
- Some worked **alone**, some in **groups**
- **Research Question** – Fundamental to Scientific thinking
- Investigate their research question
- Posters are important in academia
- Posters are an **invitation to conversation**
