

```

# Problem 1
# Ask the user for a word
word = input("Enter a word: ")

print("The word's characters separated individually are:")

# Loop through each character in the word
for char in word:
    print(char)

# Problem 2
# Ask the user for a number
n = int(input("Enter a number: "))

# Initialize total to 0
total = 0

# Loop from 1 up to and including n
for i in range(1, n + 1):
    total += i

# Problem 3
# Display the result
print("The sum of all numbers from 1 to", n, "is:", total)

# Ask the user for a number
n = int(input("Enter a number: "))

# Use a for loop to print the multiplication table
for i in range(1, 11):
    print(n, "x", i, "=", n * i)

# Problem 4

# Secret number (set beforehand)
secret_number = 7
finished = True
while finished:
    guess = int(input("Guess the number (1-10): "))

    # Check if the guess is correct
    if guess == secret_number:
        print("Correct! You guessed it!")
        ##Can also do finished = False as good programming habit!
        break # End the loop when the player wins

    # If the guess is out of range, skip to the next iteration
    if guess < 1 or guess > 10:

```

```

        print("That's not between 1 and 10! Try again.")

        continue # Skip back to the top of the loop

# Otherwise, guess is wrong but valid
print("Try again!")

# Problem 5

# Simple text adventure game

print("Welcome, hero! You enter the dark dungeon...")
health = 3

while True:
    print("You have", health, "health points.")
    direction = input("Do you go left or right? ").lower()

    if direction == "left":
        print("You fight a goblin! You lose 1 health.")
        health -= 1
    elif direction == "right":
        print("You found a treasure chest! You win!")
        break
    else:
        print("You stand still... Nothing happens.")
        continue

    if health <= 0:
        print("You have no health left. Game over!")
        break

    keep_going = input("Do you keep going? (yes/no) ").lower()
    if keep_going != "yes":
        print("You leave the dungeon safely. Goodbye!")
        break

```
