

## Week 5 - Revision | 20th November 2025

### Problem 1.1: Simple Number Printer

- Ask the user for a number
- Print out all the numbers from 1 up to **but not including** that number!

#### Example Output:

Enter a number: 4

1

2

3

### Problem 1.2: Simple Number Printer with Error Handling

- Use your code from the previous problem
- If a user enters a number  $\leq 1$ , repeatedly ask the user to try again until they enter a valid number

#### Example Output:

Enter a number: 1

Number must be > 1!

Enter a number: 0

Number must be > 1!

Enter a number: 4

1

2

3

### Problem 2.1: Summing user number

- Ask a user to enter a number
- Add this number to a variable called `total`
- Repeat this **3 times**

### Example Output:

Enter a number: 5

Enter a number: 3

Enter a number: 2

Your total: 10

# hint: the total is 10 because  $5 + 3 + 2 = 10$

### Problem 2.2: Summing user number

- Continue using your code from the previous solution
- Ask a user to enter a number
- If the number is **even**, add this number to a variable called `total`
- If the number is **odd**, subtract this number from `total`
- Repeat this **4 times**

### Example Output:

Enter a number: 5

Enter a number: 3

Enter a number: 2

Enter a number: 4

Your total: -2

# the total is -6 because  $-5 + -3 + 2 + 4 = -2$

Before moving on to the next problem, finish **problems 2-4** on the previous week's worksheet if you haven't already! You can find it on **Google Classroom (Week 4)**. Ask an educator if you can't find the previous week's worksheet.

### Problem 3: Advanced Number Guessing Game

- The player starts at **10** lives
- The game continues until the player dies (**0 lives**)
- A random number is generated between 1 and 20
- If the user guesses the correct number, their lives are set to 10, and a new random number is selected.
- If the user guesses the incorrect number, they lose 1 life.
- Keep track of the number of turns the user takes! The person who stays alive the longest wins a **prize!**

#### Example Output:

Welcome to the Advanced Number Guessing game!

Guess the number: 19

Wrong! You lose a life

Guess the number: 18

Correct! You are back to 10 lives now!

...

Guess the number: 14

Wrong! You lose a life

Game over. You survived [INSERT\_NUMBER\_OF\_TURNS\_HERE] turns. Well done!
