

Piece and Price correlation

We can see that usually the higher the piece count, the higher the price. So we would expect the highest piece set to be the highest price. However, the set with the most pieces is actually on the cheaper side of the graph around the 200\$ price range. The most expensive sets around 800\$ sit around the 6000-8000 piece range.

Price and Set count.

We can see that LEGO releases a lot of set below the 100\$ range, until a sudden drop that just keeps going down. However this information may not be correct because some set prices in the data set are not available, so there might not be the actual amount of sets.

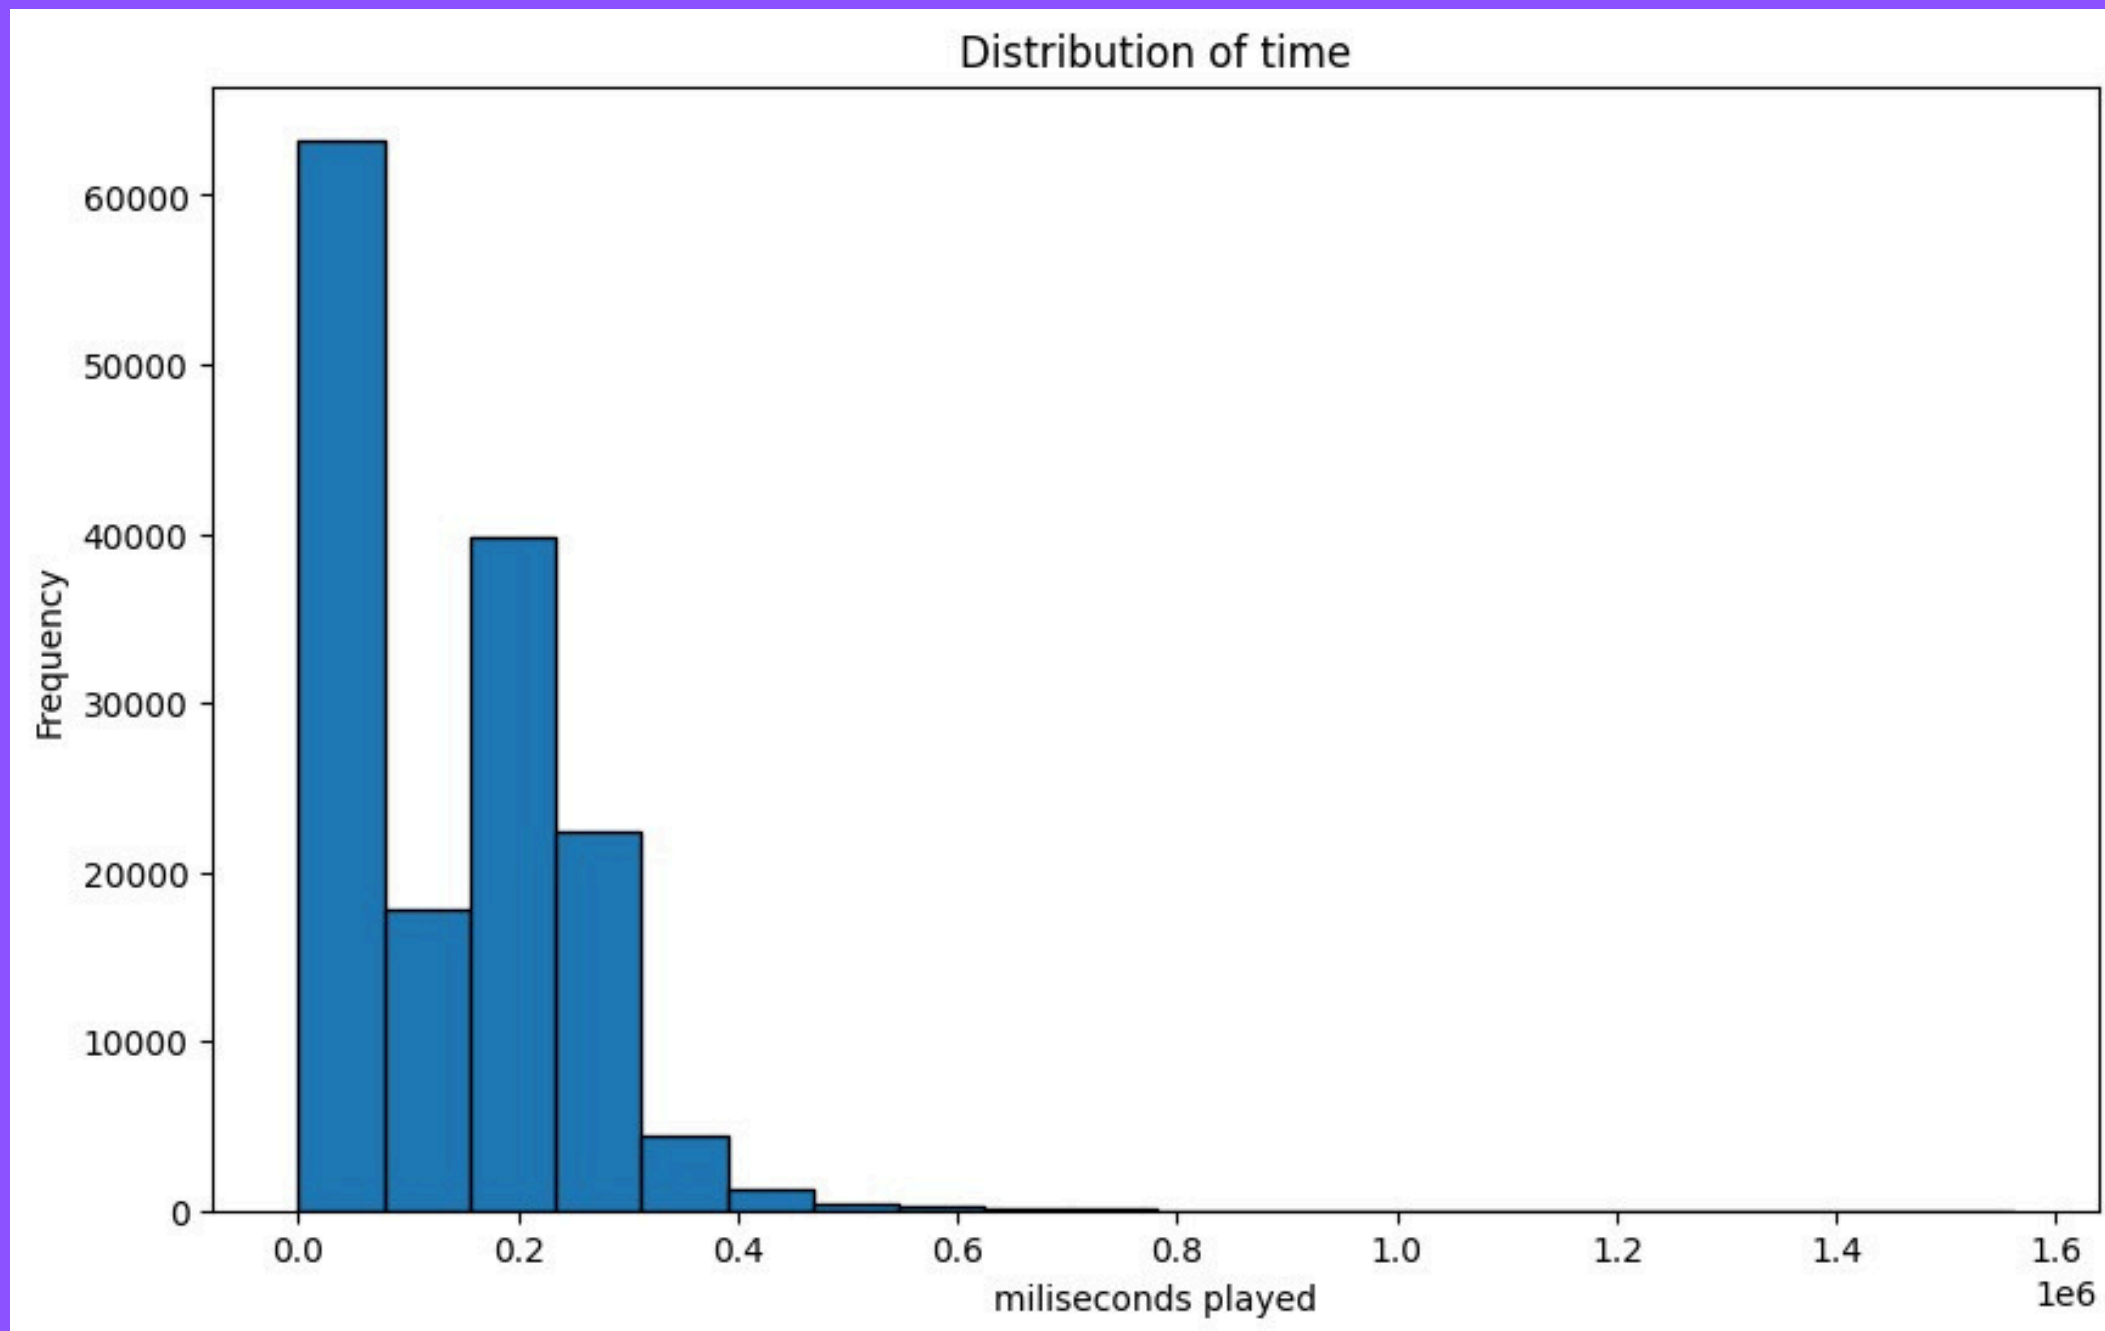

Stats

The Cheapest and most Expensive sets.

I also learned that the cheapest set is 1.49\$ and the most expensive set was 849.99\$.

SPOTIFY STREAMING HISTORY

The Beatles, 13621 ms

The Killers, 6878 ms

John Mayer, 4855 ms

Bob Dylan, 3814 ms

Paul McCartney, 2697 ms

Led Zeppelin, 2482 ms

Johnny Cash, 2478 ms

The Rolling Stones, 2390 ms

Radiohead, 2305 ms

The Black Keys, 2231 ms

The minimum time spent listening to a track was 0 milliseconds.

The maximum time spent listening to a track was 156125 milliseconds.

There were 4113 unique artists listened to.

The median time spent listening to a track was 138840.0.

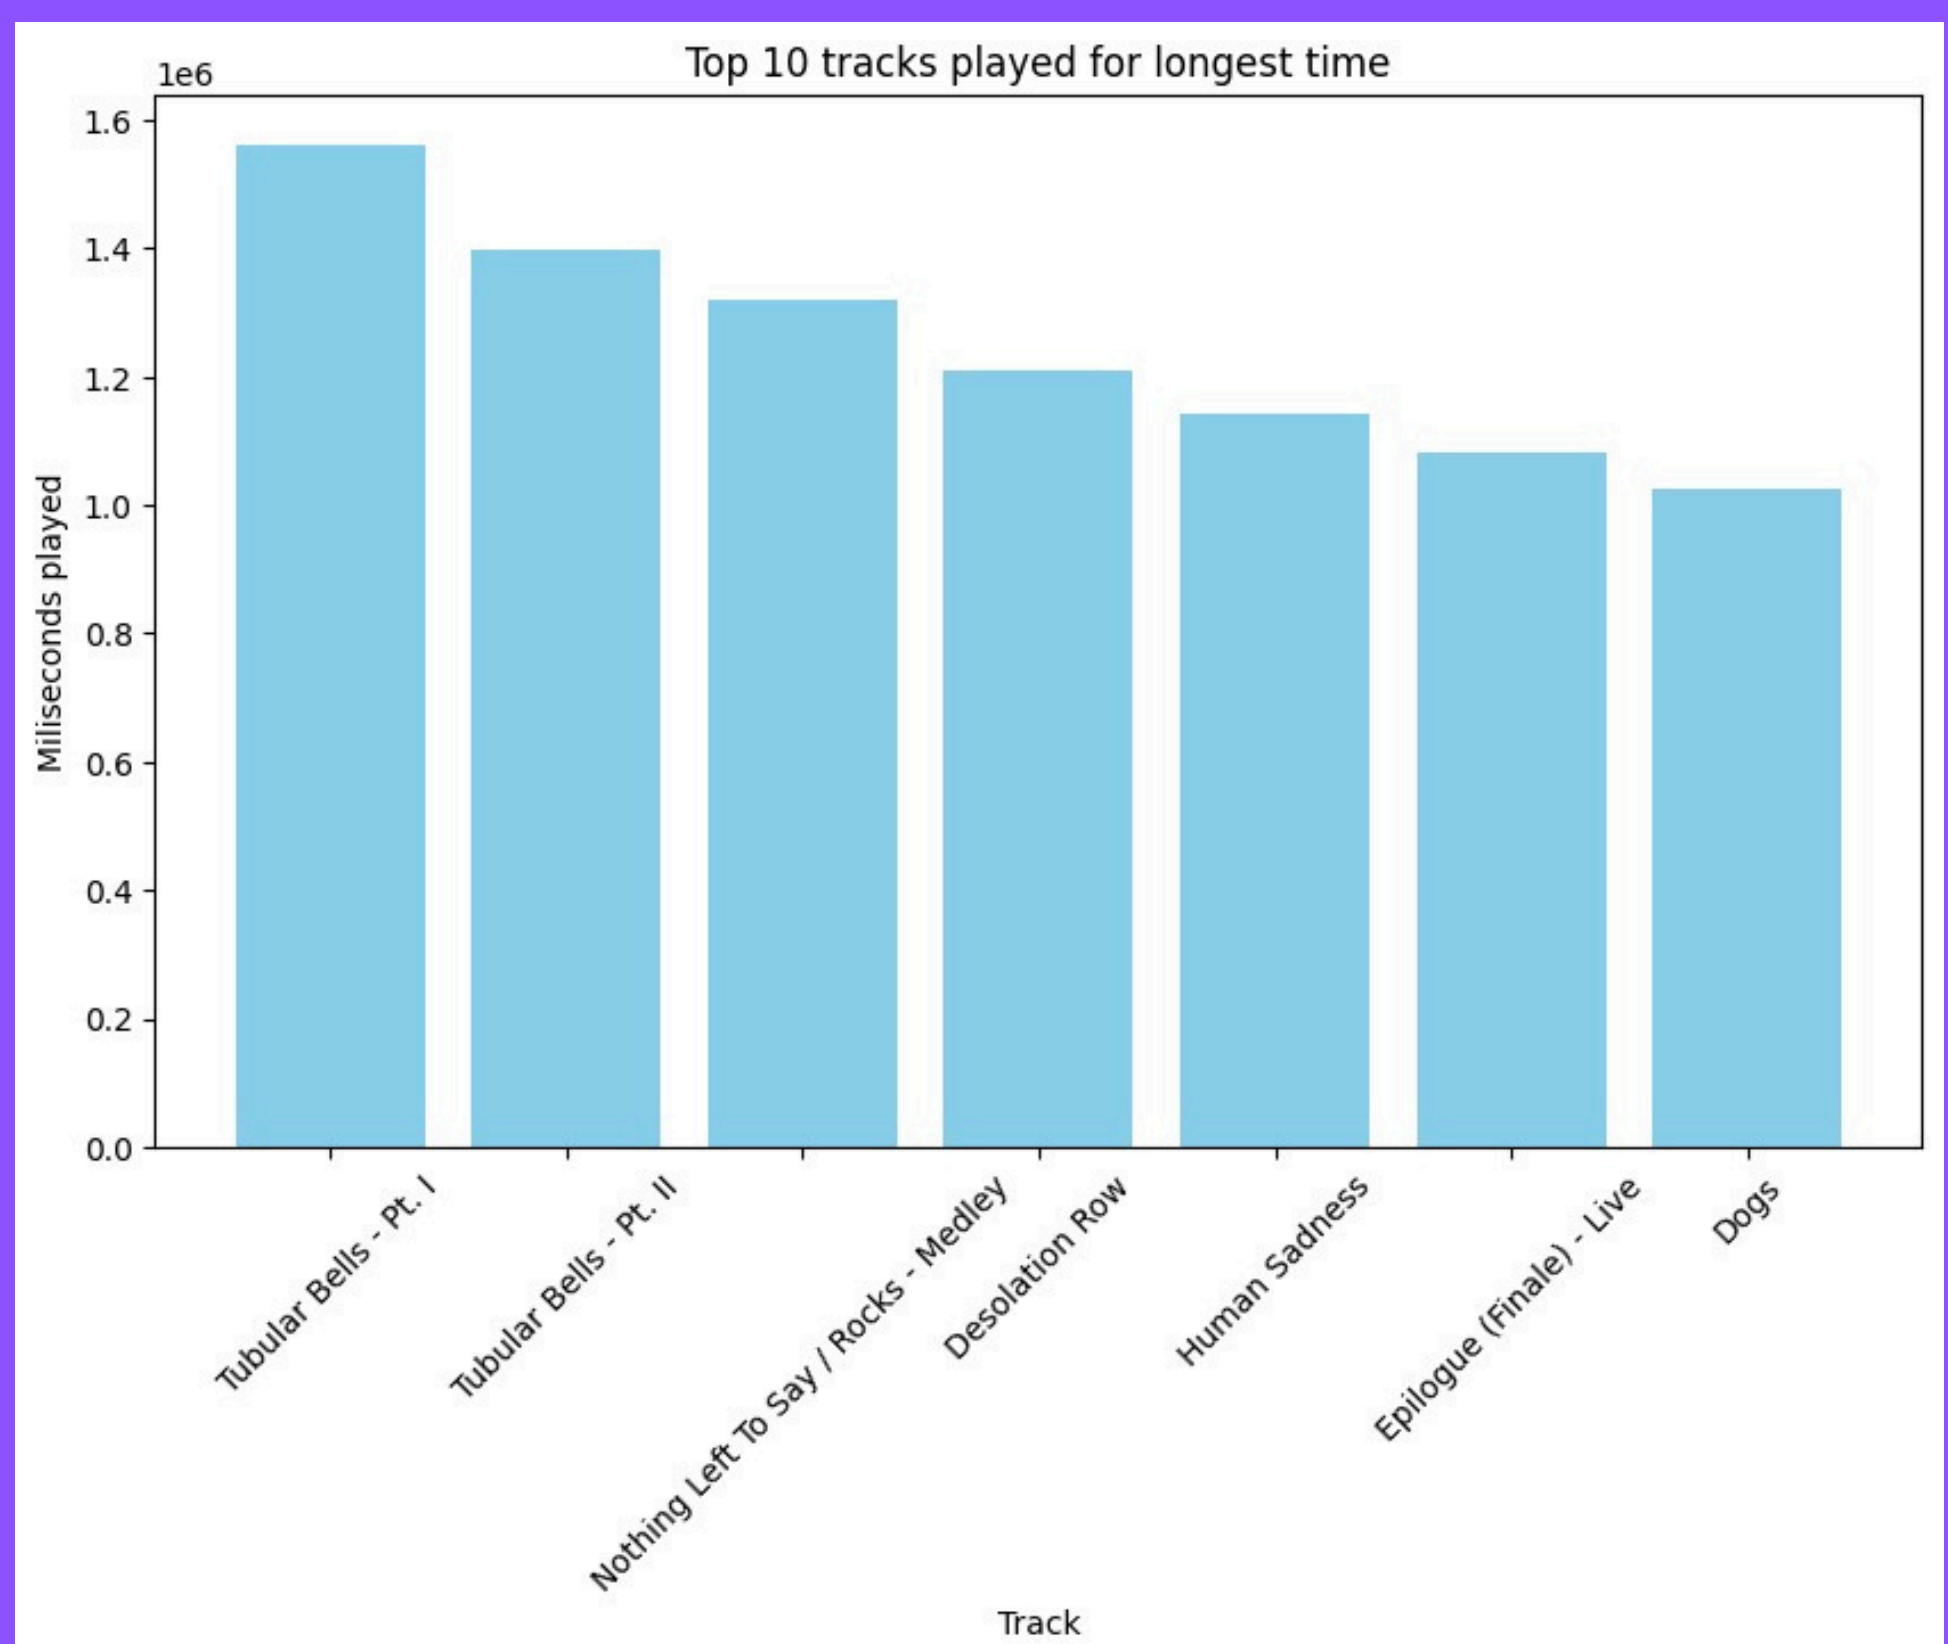

The most common (mode) artist played was The Beatles.

The mean milliseconds spent on a track was 128316.63509275323.

These are the top 10 artists that were listened to, in order -->

The top histogram shows the frequency of tracks played for different durations (in milliseconds)

This bar chart lists the top 10 tracks that were played for the longest time

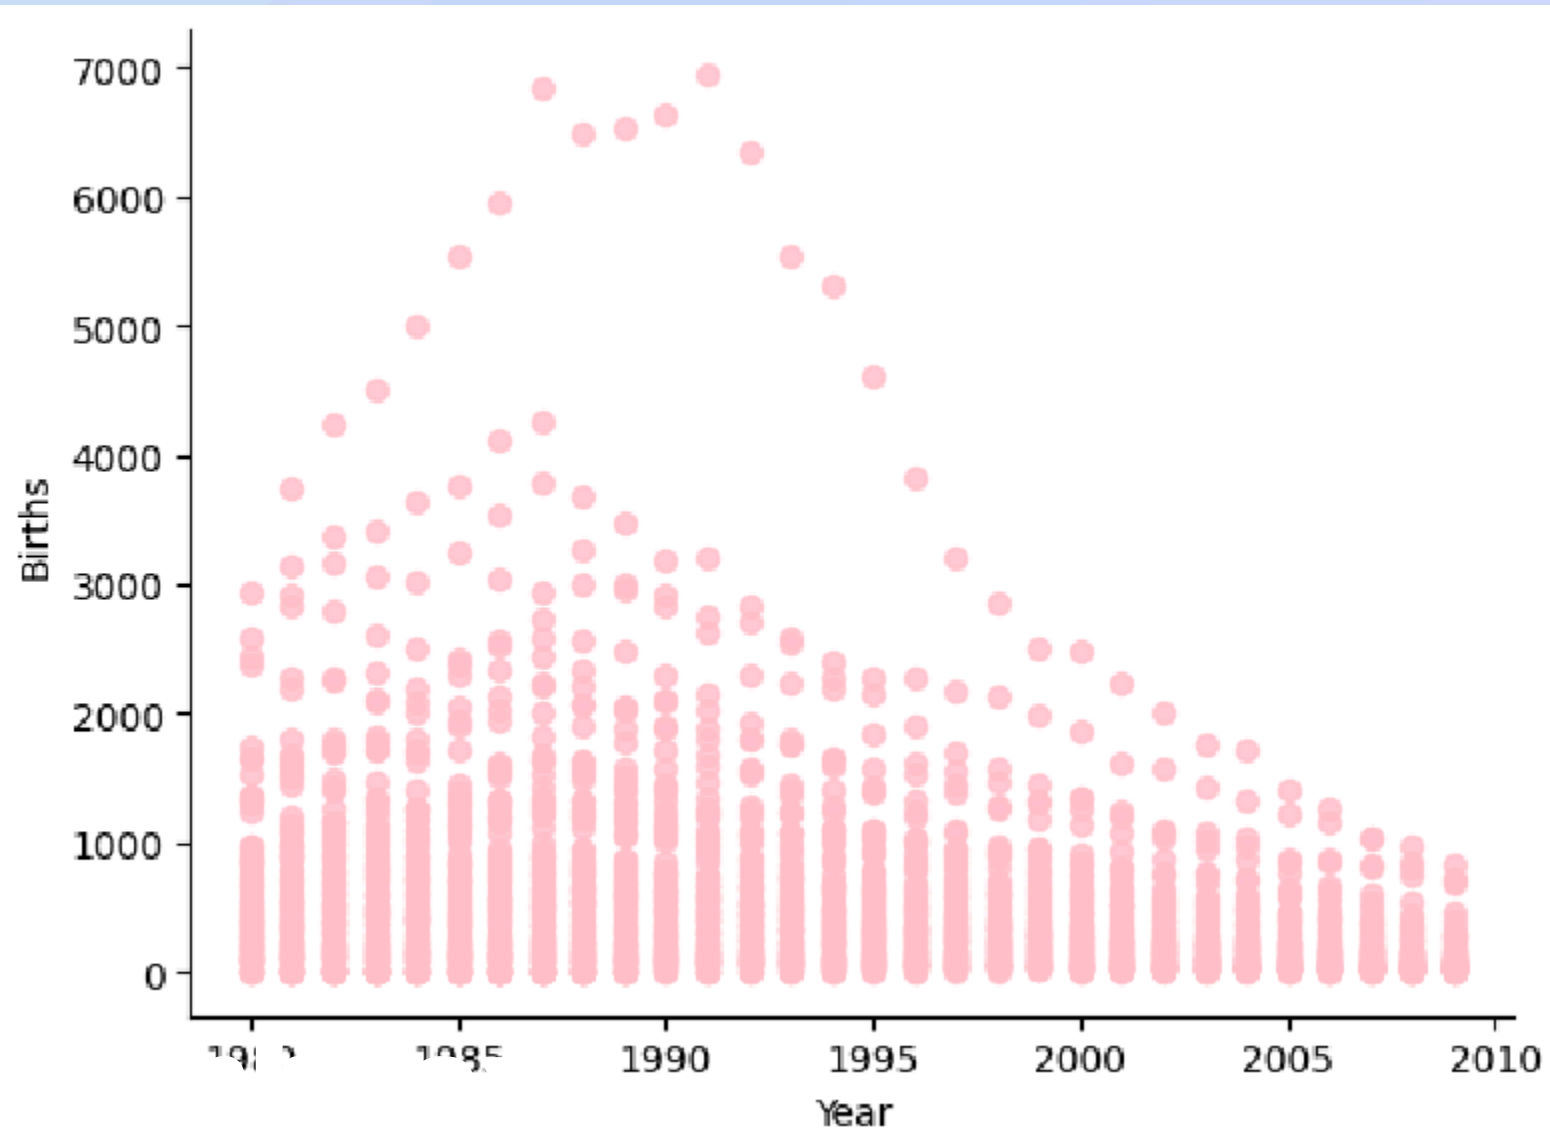

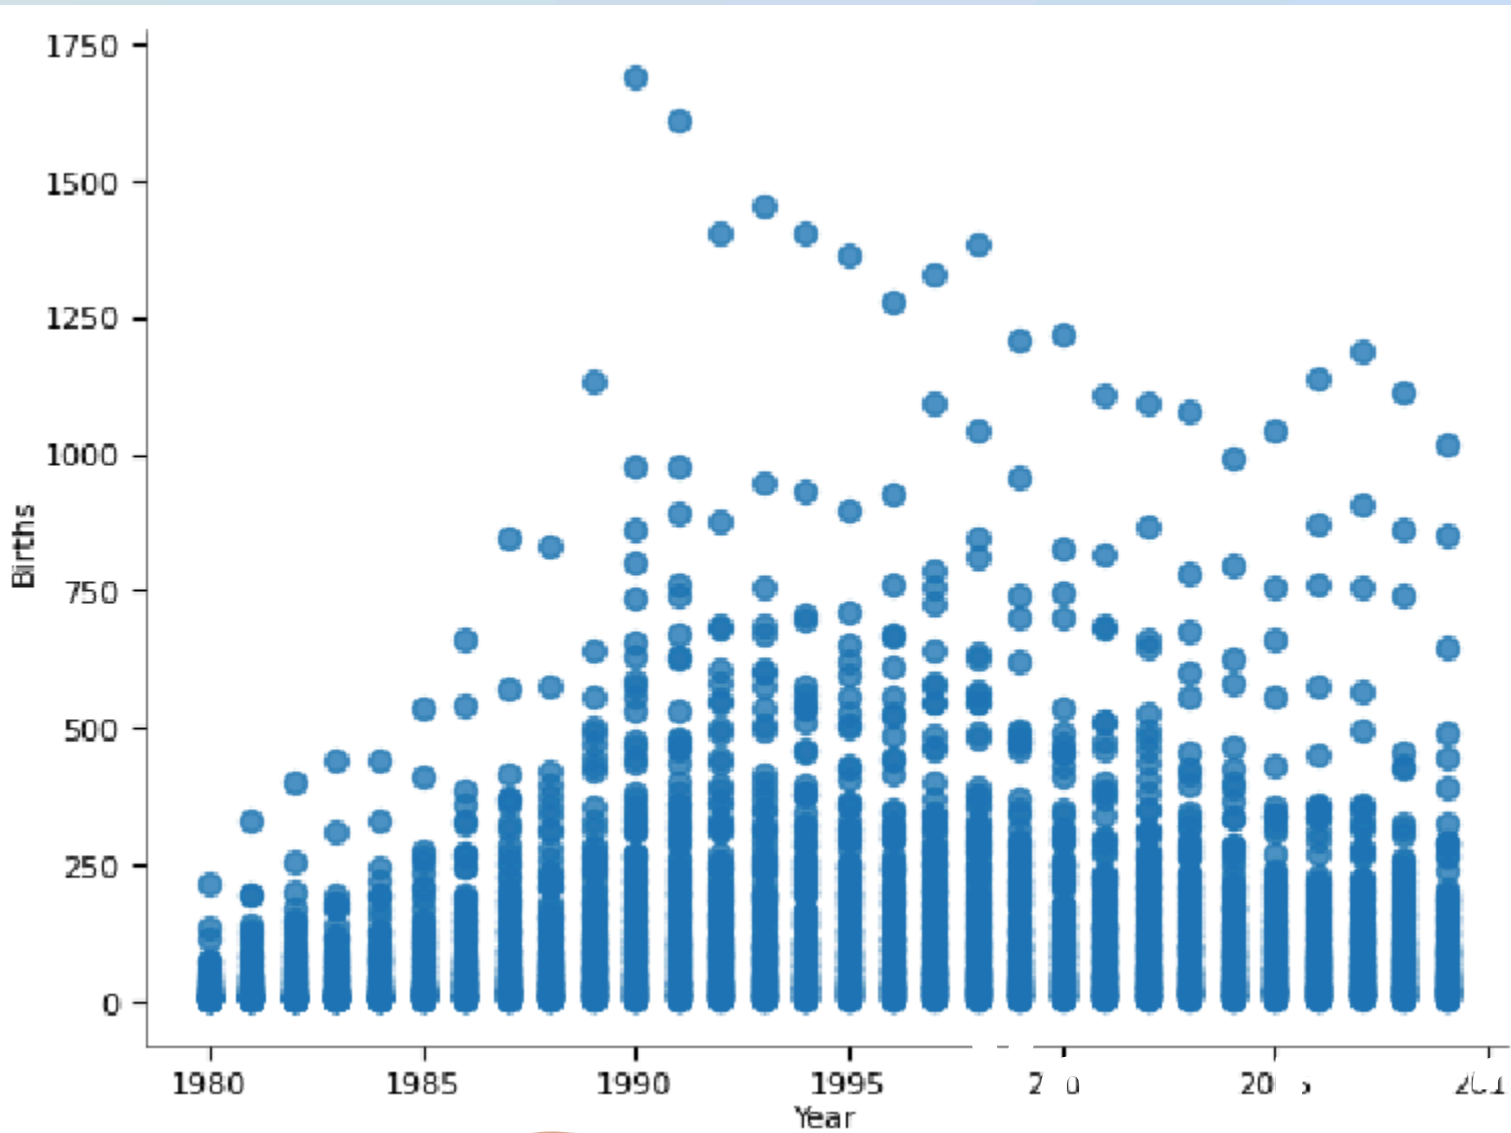

Baby Names

Distribution Graph of Births

Names: Jordan and Max

Names: Jessica and Sarah

Jordan and Max: The graph shows a gradual increase in popularity through the late 1980s and 1990s, peaking in the mid-1990s to early 2000s

Jessica and Sarah: These names were much more popular overall, peaking sharply in the late 1980s and early 1990s (with up to 7000 births in a year), then experiencing a steady decline in popularity through the 2000s.

**Minimum
number of
births in a
year is 5 in
Georgia**

**Maximum
number of
births in a
year is 126
in Georgia**
